

JOSÉ ALBERTO LÓPEZ LÓPEZ

BACHELORS IN PHYSICS
MASTERS IN ARTIFICIAL INTELLIGENCE

✉ j6.josealberto@gmail.com

ABOUT ME

Artificial Intelligence developer with 10+ years of experience, primarily in Python and C++, applied to big data, data science, computer vision and robotics systems. Contributing to large-scale data pipelines processing 10M+ records daily as well as building and optimizing code for computer vision and robotic systems.

RELEVANT EXPERIENCE

Senior Big Data Developer

SANTANDER · Ciudad de México, Mexico
dec 2022 – may 2025

Big data developer in projects related to bank fraud prevention and ETL processes, using Spark with Scala and Python, Hadoop and Snowflake (SnowSQL and Snowpark).

Artificial Intelligence Developer

GRUPO SALINAS · Ciudad de México, Mexico
dec 2021 – aug 2022

Big data AI developer in projects related to bank credit fraud prevention through AI models, using Spark, Hadoop, Kafka, among others.

Data Scientist

MIGALA · Ciudad de México, Mexico
dec 2021 – feb 2022

Data analysis of an inquest realized to potential members of a new political party. Foundations of Blockchain project with Solidity and other components.

Data Scientist

BEST PRACTICES CONSULTING · Querétaro, Mexico
mar 2021 – sep 2021

Data visualizations designer with Power BI for several companies projects, including a dashboard with information about gas distribution routes in real time.

PROGRAMMING LANGUAGES

	Junior	Senior
Python		
C++		
Scala		
SQL		
Java		
Solidity		
Others		

FRAMEWORKS & TECHNOLOGIES

Linux	
Git	
Spark	
MongoDB	
Kafka	
AWS	
ROS	
Blockchain	
Docker	
Kubernetes	

COMPLEMENTARY EXPERIENCE

- Experience in Keras and TensorFlow for deep learning and machine learning.
- Robotic Operative System (ROS) with C++ and Python.
- Knowledge of dense, convolutional, and recurrent neural networks; as well as evolutionary and nature-inspired algorithms.
- Computer vision with OpenCV library in C++ and Python.
- Experience in parallel programming with OpenMP and MPI libraries in C and C++ and strong inclination toward efficient and optimized code.
- Experience working with data science applied to geographical and cities databases.
- Large experience in data visualization with Matplotlib, Gnuplot, TikZ-PGF and Power BI.
- Mathematical foundations of models for time series analysis, like ARIMA, SARIMA, VARMA, Dickey-Fuller test, Granger causality, Holt-Winters method, EWMA, ETS, Hodrick-Prescott filter, etc.

EDUCATION

- 2020 **Masters in Artificial Intelligence**
ARTIFICIAL INTELLIGENCE RESEARCH CENTER
· University of Veracruz, Mexico  
- 2018 **Bachelors in Physics**
FACULTY OF PHYSICS · University of Veracruz,
Mexico  
Ranked 1st in class.

LANGUAGES

Spanish Native

English B2

COURSES & CERTIFICATIONS

Institute	Subject	ID and URL
AWS	AWS Cloud Practitioner	
Udemy	Docker & Kubernetes	
MongoDB Academy	MongoDB	   
Udemy	Blockchain	
Udemy	Time Series Data Analysis	
Udemy	Git	
Udemy	SQL: Basic to Advanced	
SoloLearn	C++ · Java · SQL	  

PERSONAL PROJECTS

- 2026 **docuL^AT_E**  ·  
A format and parser for code documentation from TXT to PDF via L^AT_EX, that produces a nice-looking document.
- 2019 **Robot Host** ·  
Robot host programmed in C++ with ROS. The robot detects diners via face recognition and lead them to a suitable table.
- 2019 **Augmented reality** ·  
Example of augmented reality made with Python and OpenCV.
